EvoDECO 20/EvoDECO 32

The evolution of a revolution

For bars from 4 to 32 mm

TORNOS PROVIDES SOLUTIONS TO HIGH-TECH INDUSTRIES SPECIALISING IN THE FOLLOWING SECTORS

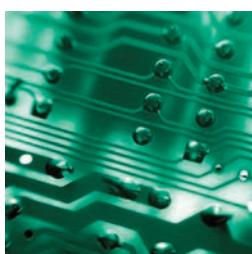

AUTOMOTIVE

MEDICAL

ELECTRONICS

MICROMECHANICS

MAJOR TECHNOLOGICAL DEVELOPMENT OF THE DECO PLATFORM

EvoDECO 20 and EvoDECO 32 high-end machining solutions designed to maximise productivity, performance, autonomy and accessibility.

Productivity

- 4 completely independent tool systems.
- 10 numerical axes and 2 C axes which are perfectly interpolable.
- Ultra-dynamic powered spindles with synchronous motors.

Performance

- Wide selection of devices and peripherals (DECO line compatibility).
- Continuous temperature stabilisation.
- Motorspindle offer high output and torque.

EvoDECO 20/EvoDECO 32

Accessibility

- Easy to program thanks to TB-DECO software (DECO line compatibility).
- Huge machining area.
- Integration of peripherals.
- Ergonomics designed with the operator in mind.

Autonomy

- Excellent removal of swarf and cutting oil.
- Great machining autonomy without human intervention.
- Automatic cyclical lubrication.
- Integrated Tornos feeder (optional).

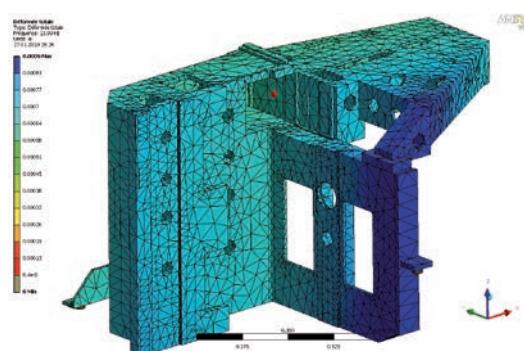

PERFORMANCE, AUTONOMY, RIGIDITY AND ACCESSIBILITY...

- New powered spindle technology.
- Entirely designed and manufactured by Tornos in Moutier, Switzerland.
- Identical main spindle and counter spindle with very powerful synchronous motors.
- Heat exchanger guarantees stable temperature and high precision of the spindles.
- The motors provide high output and torque.
- Reduction in downtime (stoppages, indexing, acceleration, deceleration) 0 to 10,000 rpm in 0.9 seconds.
- Low noise and low maintenance.
- The most powerful spindles ever integrated on a sliding headstock lathe (9.5 kW/18.1 kW).

Increased rigidity

- Optimised machining performance (speed and feeds) for increased productivity.
- Higher quality finishes.
- Increased machining precision.
- Increased tool service life.

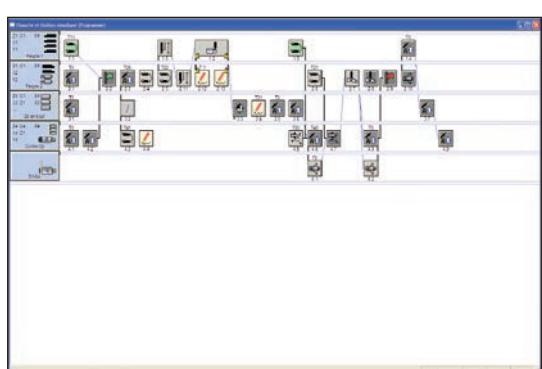

A GOOD RATE OF RETURN GUARANTEED

Programming

TB-DECO ADV programming software can be used to create programs for all single spindle products in the EvoDECO family.

- Easy to program, with icons for productive and non-productive operations.
- Tool library.
- Graphic synchronisation of simultaneous operations.
- Calculation of actual machining time (Gantt chart).
- Check the program and tool trajectories using graphic simulation.
- PC programming and transfer of programs via Ethernet or PCMCIA/USB card.
- Various machining macros for specific operations (thread chasing, drilling/unblocking cycles, machining of complex shapes, torx, etc.).
- Free update.
- Tornos Software Hotline.
- Program compatible with others in the DECO range.

Integrated PC

- Program editing on the machine.
- Service instructions available on the machine.
- Remote maintenance.
- Possibility to control various peripheral units.
- Large colour touch screen.
- USB.

EvoDECO 20/EvoDECO 32

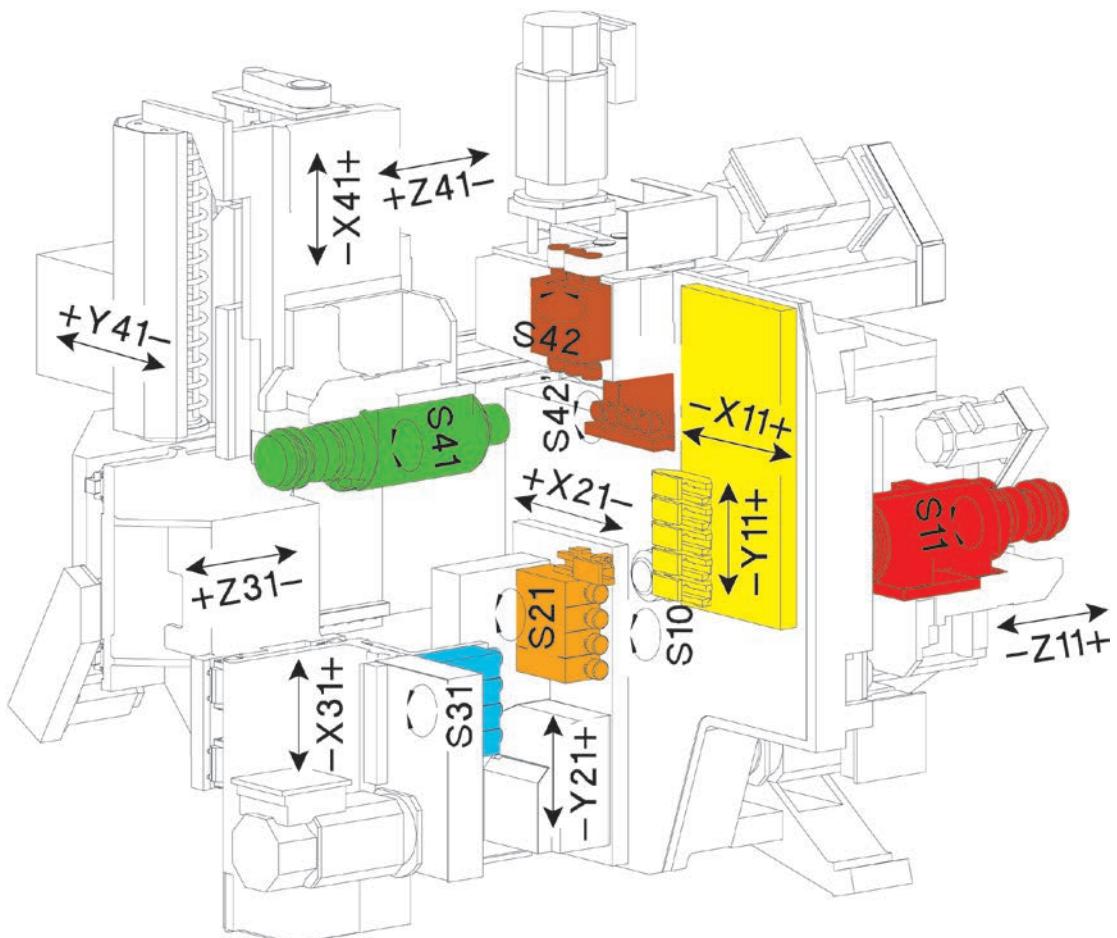

Ergonomics

The wide machining area enables the operator to access the tools easily and guarantees effective removal of swarf. The integration of the SBF feeder control directly on the machine's NC facilitates programming and the use of the EvoDECO.

Autonomy

To improve the machine's profitability, the EvoDECO has been designed to enable long periods of operation without human intervention. The preheating system, the independent spindle cooling circuit, the automatic filtration of swarf and the automatic cyclical lubrication – many systems which ensure the EvoDECO's autonomy.

KINEMATICS

Most powerful drivetrain ever designed

The EvoDECO platform relies on the drivetrain which was the key to the DECO platform's success :

- 4 independent tool systems.
- Maximum modularity.
- Possible to work with 4 tools simultaneously (3 for operation and 1 for counter-operation).
- Blank turning and finishing using the guide bush.

- Possible to operate in differential mode (stroke progression) for simultaneous turning and drilling using the guide bush.

- Counter-operations can be carried out completely during concurrent operation time.
- 10 linear axes and 2 simultaneous C axes.
- Up to 27 positions of which 17 can be rotating.
