# Exciting Updates and Savings on Fanuc Parts!

## Dear Valued Customer,

We are thrilled to announce that beginning February 1<sup>st</sup>, 2024, we're rolling out new, reduced prices across a wide array of Fanuc parts! Get ready to access your favorite products at even more attractive rates.

But that's not all! We're also introducing an innovative addition to our Fanuc lineup: the "Reconditioned Parts Family". Embrace significant savings with these expertly refurbished items, offered at a compelling 15% discount compared to new parts. Plus, enjoy the flexibility of standard exchange options. For instance:

- **Original:** 226 717 Amplifier for 2 axes SVM 2-12/12
- **Reconditioned:** 226 717R Amplifier for 2 axes SVM 2-12/12 - R

These reconditioned parts will be prominently featured for your convenience during the identification process on our Portal. Moreover, they are available upon request for regular quotations through Your local Tornos Representative.

We're excited for you to benefit from these enhancements and savings. Thank you for your continued trust in us.

Warm regards,

Tornos Service
