

## Service and Applications Technician

### Who are we looking for?

High service quality is the basis of customer satisfaction and customer satisfaction is therefore of utmost importance to us. We are expanding our service in Spain and are looking for you as a service technician to strengthen our team.

### Our company

Tornos company specializes in the manufacture of machines designed to produce parts requiring extreme precision and quality. Since our 1914 founding, Tornos has pioneered sliding headstock technology. True to our promise, "We keep you turning," we manufacture CNC sliding headstock automatic turning machines, cam- or numerically controlled and multi-spindle machines, for complex workpieces requiring high-precision machining, all backed by our own software and services. Rooted in Switzerland, Tornos' global footprint keeps us close to our customers. Manufacturers across a wide range of growing market segments—from automotive and medical and dental to micromechanics and electronics—turn to Tornos for unique workflow solutions.

### What are your tasks?

The Service and Applications Technician will be connected to technical support and sales support, helping to drive the company, TORNOS product portfolio and services. Responsibilities include programming, training, configuration, processes, time studies, technical sales support and customer training to get the most out of our products.

We keep you turning
