

CNC Swiss Applications Engineer (100%)

Machine Tools & Solutions for turned parts production

Who are we looking for?

Tornos Technologies U.S. Corporation is seeking an ambitious CNC Swiss Application Engineer who shares the company's passion for Swiss turning and precision.

Who is Tornos?

Tornos means maximum precision in an innovative and exciting environment. The Tornos Group has 600 employees and is one of the world's leading companies in the development, manufacture and sale of Swiss-type automatic lathes and multispindle machines. The Tornos headquarters are located in Switzerland.

Your main tasks:

- *Assist customers with technical, application or service-related questions in close cooperation with the machine sales and applications teams*
- *Conduct on-site operator training*
- *Manage and lead new project launches from start to finish*
- *Collaborate with Service Engineers for commissioning of machines in showroom and at customers*
- *Multi-state travel to customer sites (30% of work week)*

What do we offer?

An interesting and versatile position in an international environment and a competitive remuneration package.

Your Profile:

- *5+ years of experience in setting up CNC lathes and/or Swiss lathes (preferred)*
- *Experience with FANUC and/or Mitsubishi controls*
- *Experience with any CAM software*
- *Ability to create solid models with drafting software SolidWorks, Autodesk, Creo, CATIA*
- *Proficient in the MS Office package*
- *Second language (German, French, Spanish) a plus*

Would you like to shape Tornos Technologies U.S. Corp? Then we look forward to receiving your detailed application, preferably by email.
